

Vedant Vardhaan

La Jolla, CA | 858-752-3541 | vvardhaan@ucsd.edu | [LinkedIn](#) | [GitHub](#) | [Website](#)

EDUCATION

University of California - San Diego (UCSD)

La Jolla, CA

Bachelor of Science in Data Science and Finance | **GPA: 3.95**

Sep 2023 – Jun 2027

- **Relevant Coursework:** Data Structures, Algorithms, Deep Learning, Machine Learning, Object-Oriented Programming, Databases, Probability & Statistics

EXPERIENCE

Chief Technology Officer and Full-Stack Engineer

May 2026 – Present

Unicircle (UCSD Incubator-Listed) | React/TypeScript, Supabase, Vercel

San Diego, CA

- Architected and shipped the full stack of [unicircle.app](#), a club discovery and recruitment platform for UCSD students, on React, TypeScript, Supabase, and Vercel, owning everything from schema design to production deployment.
- Designed a PostgreSQL data model and serverless backend on Supabase Edge Functions, enforcing FERPA and CCPA compliance with row-level security across all student data access.
- Set engineering standards, code review, and CI/CD pipelines for all contributors, and advise the CEO on technical roadmap and feasibility.

Engineering Manager & Software Engineer

Nov 2024 – Present

CSES Open-Source

La Jolla, CA

- Build TritonSpend, a mobile-first financial wellness app on React Native, Node.js, PostgreSQL, and Supabase, actively used by 100+ UCSD students for spending and savings tracking.
- Designed RESTful backend APIs and real-time transaction workflows powering budgeting, analytics, and goal tracking.
- Led a 6-engineer team through agile sprints, code review, and CI/CD, improving delivery speed by 30% and reducing deployment bugs by 40%.

Technology Consultant Intern - AI Engineering

Jun 2025 – Sep 2025

PricewaterhouseCoopers (PwC India)

Gurugram, India

- Engineered an enterprise multi-agent cloud automation system with LangGraph, LangChain, and Gemini 2.5 Pro that orchestrated AWS and Azure onboarding workflows across 15+ cloud services.
- Built modular backend services for credential management, IAM configuration, and resource provisioning, reducing end-to-end provisioning time by 60%.
- Integrated secure infrastructure pipelines with Azure Key Vault, CloudTrail, and GuardDuty, reducing manual configuration errors by 45%.

Undergraduate Researcher - Project Lead

Oct 2025 – Apr 2026

Engineers for Exploration (E4E) @ UC San Diego

La Jolla, CA

- Led engineering of a geospatial data pipeline fusing drone and Sentinel-2 satellite imagery to predict mangrove presence, processing 10+ GB of remote sensing data.
- Built modular preprocessing and feature-fusion workflows in Python with TensorFlow and Google Earth Engine for scalable batch inference across coastal regions.

PROJECTS

InvasiveWatch: Global Species Tracker | React Native, FastAPI, Mapbox, Python

Jan 2026 – Mar 2026

- Built a full-stack environmental intelligence platform on React Native and FastAPI, integrating multiple biodiversity APIs to surface invasive species risk across user-selected regions.
- Engineered a species risk-ranking pipeline backed by FAISS vector search over 96K+ species (83.4% recall), fusing climate similarity, biological aggression traits, and invasion-history signals; awarded **Best Project, DS3 Winter 2026**.

The Seismic Lottery | JavaScript, D3.js, TopoJSON, HTML/CSS

May 2025 – Jun 2025

- Built an interactive seismic data platform with an animated 3D globe, live USGS data feeds, and scroll-driven storytelling using D3.js, TopoJSON, and Scrollama.
- Developed an energy calculator and infrastructure impact predictor enabling side-by-side comparison of earthquake outcomes across 50+ countries.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, R

Backend: Node.js, Express.js, FastAPI, REST APIs, Supabase Edge Functions

Frontend: React, React Native, HTML/CSS, Streamlit

Databases: PostgreSQL, Supabase

Cloud & DevOps: AWS (EC2, S3, IAM), Azure, GCP, Docker, Kubernetes, CI/CD, Git/GitHub, Vercel

AI/ML: LangChain, LangGraph, PyTorch, TensorFlow, Scikit-learn, Hugging Face, FAISS

Tools: Pandas, NumPy, Jupyter, VS Code, Cursor, Claude Code
